WORK EXPERIENCE

ZAAG SYSTEMS LTD. – SOFTWARE ENGINEER (HYBRID)

03 February 2022 – present

- **Led front-end development** of a high-traffic investment platform, improving UX across devices, enabling multilingual support, streamlining workflows, and enhancing document handling.
- **Developed** a modular, multi-page tour guide system with lazy loading and responsive layouts, improving user interaction and load times.
- **Engineered** a Zoom extension with a dynamic form builder and API integration, enabling complex business logic and enhancing service flexibility.

SEMICLONE INC. – FRONTEND DEVELOPER (REMOTE)

01 July 2021 – 01 January 2022

- **Built custom UI components** and responsive dashboard pages to enhance usability and user experience across internal tools.
- **Explored real-time communication**, learning WebRTC and Socket.IO to support the development of a chat feature.
